DON'T FALL FOR AUTUMN HAZARDS: FOLLOW THESE TIPS FOR A SAFE SEASON

BY SCOTT MEINECKE

As the weather cools and the leaves begin to change colors, many Iowans are busy with outdoor projects or getting students settled into college

housing. Whether you're climbing a ladder, working the fields or firing up a space heater, take a few minutes to review these important safety tips.

Ladder safety

Outdoor chores like cleaning gutters and trimming trees often require the use of ladders or tall tools. Stay safe by remembering to look up and be aware of power lines as you use ladders or large tools on your property.

Ensure the ladder is on level ground and that the base is stable. Always maintain three points of contact on the ladder – two hands and one foot or two feet and one hand. Carry tools in a tool belt or pouch to keep your hands free when climbing the ladder. If possible, have another person hold the base of your ladder when you are on it.

Harvest safety

In Iowa, we know autumn has arrived when we see combines in the fields. We remind farmers and field workers to maintain a 10-foot clearance around power lines and poles and to use a spotter when raising or lowering large equipment or high loads that could come into contact with power lines.

If you are in a vehicle or implement that makes contact with power lines, stay in the cab, contact the local power utility or law enforcement, and keep others away from you until an authority confirms that the power line has been de-energized.

If there is a fire in the cab and you need to exit, jump clear of the equipment without touching it and keep your feet together. Then, bunny hop away with both feet together or shuffle-walk away without lifting your feet off the ground.

Dorm safety

It's also the time of year when college students move into dorms, apartments and off-campus housing. If you have a student in college, take time to discuss electrical safety and fire safety. Locate fire alarms and fire extinguishers, and walk through the best way to evacuate the space in case of a fire.

Talk to your student about the dangers of overloading electrical outlets and how to use extension cords. For example, don't "daisy chain" extension cords to each other, and don't plug major appliances into extension cords. Unattended cookware is the leading cause of dorm fires, so remind your student to keep an eye on food while it's cooking.

Space heaters

Cooler autumn weather also ushers in the use of space heaters. Remember to plug your space heater directly into a wall outlet; it could overload a power strip or extension cord. Keep your space heater at least 3 feet from anything that might burn, including furniture, bedding or curtains.

Never leave pets or children unattended around space heaters, and shut them off when you go to sleep or leave the room. Only use space heaters that automatically shut off when tipped over.

Move over, slow down

Iowa motorists are required by law to move over or slow down when approaching ANY vehicle on the side of the road with flashing lights activated, including co-op utility trucks. Give our co-op employees room on the road to work safely; their families thank you!

Scott Meinecke is the director of safety and loss control at the Iowa Association of Electric Cooperatives.

EDITOR'S CHOICE CONTEST

WIN AN ELECTRIC LEAF MULCHER!

The new Worx leaf mulcher makes collecting leaves easier and quicker. Turn 11 bags of leaves and debris into one with the 13-amp electric leaf mulcher. This tool features a clean air motor cooling system, enabling it to run at peak efficiency and keep mulching up to 53 gallons of leaves per minute.

Visit our website and win!

Enter this month's contest by visiting www.ieclmagazine.com no later than Sept. 30. You must be a member of one of Iowa's electric cooperatives to win. There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified.

The winner of the Solo Stove Runner tabletop fire pit from the July issue was **Barbara Buseman**, a **Grundy County REC** member-consumer.

ENTER ONLINE BY SEPT. 30!

DID YOU READ OUR NEWSLETTER CAREFULLY?

We have selected two lucky winners for a \$25 bill credit! Spot your account number in our newsletter and call us! (Example: Account 4321 is written four three two one.) Members must contact Harrison County Rural Electric Cooperative by Sept. 30 to be eligible to claim this credit.

**Questions? Contact our office
by calling 712-647-2727.**

CELEBRATING MEMBERSHIP AT ANNUAL POWER PICNIC

Harrison County Rural Electric Cooperative (REC) was proud to celebrate our members, dedicated employees and a successful year at our annual Power Picnic on Aug. 11.

Members enjoyed a picnic supper featuring Staley's grilled steak sandwiches with employees and board members, learned more about electric vehicles, energy efficiency efforts and power safety, and won amazing prizes. Harrison County REC also celebrated its employee service awards with recognition to Electrician Apprentice Clay Kuhlman for five years of service to the cooperative.

HARRISON COUNTY REC MEMBERS EXPERIENCE POWER GENERATION FIRSTHAND ON THE ENERGY TRAIL TOUR

Harrison County Rural Electric Cooperative (REC) members, alongside more than 130 electric cooperative members from western and north central Iowa, embarked on an educational adventure this summer, participating in three motorcoach tours that showcased the journey from power generation to their homes and businesses. The 36th annual Energy Trail Tour season featured three tours departing from Northwest Iowa Power Cooperative (NIPCO) in Le Mars, with tours June 18-20, June 25-27 and July 9-11.

The three-day educational experience took participants through the Dakotas to visit key facilities operated by Basin Electric Power Cooperative (Basin Electric) and Western Area Power Administration (WAPA). These are the primary power suppliers for local distribution cooperatives through their generation and transmission partners NIPCO and Corn Belt Power Cooperative (Corn Belt Power). Account number six seven nine zero zero zero two zero.

TOUR DESTINATIONS AND LEARNING EXPERIENCES

Oahe Power Powerhouse and Dam, and Big Bend Powerhouse and Dam

Participants explored hydroelectric generation at Missouri River facilities Oahe Dam and Powerhouse (June tours) in Pierre, South Dakota, and Big Bend Dam (July tour) in Fort Thompson, South Dakota. The visits showcased the engineering marvels of the earthen dams that created Lake Oahe, America's fourth-largest reservoir (Oahe), and Lake Sharpe (Big Bend). It highlighted how hydroelectric power plays an important role in an all-of-the-above energy generation mix.

Antelope Valley Station

Members toured Basin Electric's coal-fired power plant, including the turbine deck, control room and boiler areas, culminating with views from the 17th floor observation deck. The

visit showcased the value of coal-fired baseload generation and Basin Electric's investments in environmental control technologies to reduce emissions.

Coteau Properties Company Freedom Mine

A drive-through tour of the active surface mine demonstrated lignite coal production and land reclamation efforts. Participants witnessed massive earthmoving equipment in operation at a facility that produces approximately 15 million tons of coal annually while reclaiming about 600 acres of mined land.

Mobile classroom

Travel on a motorcoach provides an excellent "over-the-road" opportunity to learn about other generation sources and operations that produce valuable byproducts from the production of synthetic natural gas.

Wind generation education

Participants learned about the role of wind power in America's diverse energy portfolio and its contribution to the country's all-of-the-above energy approach to securing safe, reliable, cost-effective and sustainable energy production.

Great Plains Synfuels Plant

Passengers learned how coal is converted into synthetic natural gas as

well as valuable byproducts, including anhydrous ammonia, carbon dioxide and diesel exhaust fluid through Basin Electric's Dakota Gasification Company subsidiary at the Great Plains Synfuels Plant.

Cooperative values in action

Beyond the technical education, participants gained a deeper insight into the cooperative difference. They learned about the history of rural electric cooperatives, the Seven Cooperative Principles and Touchstone Energy's four service foundations: Integrity, Accountability, Innovation and Commitment to Community.

The tours combined education with fellowship, creating lasting memories while building appreciation for the complex process of delivering reliable electricity to the communities these cooperatives serve.

Power supply information

NIPCO purchases approximately 80% of its power supply from Basin Electric and 20% from WAPA, which markets power generated from the Missouri River Dam System.

Interested in participating next year? Contact our office or visit our website at www.hcrec.coop/energytrailtour to learn more about the 2026 Energy Trail Tour.

The most recent NERC assessment found that while most areas were prepared for typical summer conditions, some could experience elevated risk during periods of extreme heat or when generation resources are limited. *Photo Source: Dennis Gainer, NRECA*

STAYING POWERED DURING PEAK DEMAND

BY JENNAH DENNEY

Extreme temperatures, whether during summer or winter months, drive up the demand for electricity as homes and businesses rely on air conditioning or heating to stay safe and comfortable. Every year, the North American Electric Reliability Corporation (NERC), the nation's watchdog for grid reliability, issues two Reliability Assessment reports – one for summer months and one for winter. These biannual assessments provide independent views of how prepared the U.S. grid is to meet electricity demand when temperatures soar or dip.

The NERC assessments are critical planning tools for electric

utilities as they prepare for peak demand months. The reports provide a comprehensive evaluation of the North American Bulk Power System and highlight areas of concern regarding reliability.

What the recent reliability assessment told us

NERC's 2025 Summer Reliability Assessment found that while most areas were prepared for typical summer conditions, some regions of the U.S. could experience elevated risk during periods of extreme heat or when generation resources are limited due to planned or unplanned power outages. A few months ago, Entergy and SWEPCO customers in Louisiana

experienced rolling power outages due to grid capacity constraints.

Iowa's electric cooperatives want our members to understand how these surges in demand can impact you – and how you can play an important role in supporting reliable electric service for our local communities.

The electric grid is a vast network comprised of power plants, transmission lines and distribution systems that work together to deliver electricity to homes and businesses. Grid reliability means ensuring enough electricity is always available to meet demand – even on the hottest and coldest days of the year.

According to NERC's most recent assessment, our electric grid is experiencing rapid load growth. Across North America, the total forecasted peak demand for summer months increased by more than 10 gigawatts (GW) since 2024 – more than double the increase seen in 2023. This growth is being driven by continued economic activity, expansion of data centers and industrial facilities, and increasing electrification across many sectors.

At the same time, more than 7.4 GW of generation capacity has retired or gone inactive since last summer. Retirements include natural gas, coal, nuclear and other types of generation, which reduces the availability of dispatchable resources that can operate at any time to help balance the grid. But new resources are becoming available to help meet some of this growing demand. Over 30 GW of new solar capacity and 13 GW of new battery storage are already contributing to increased demand requirements. These resources are especially helpful during peak daylight hours but can create new operational challenges in the evening, when solar generation tapers off and the demand for electricity remains high.

Why grid reliability is everyone's responsibility

While most regions are prepared to meet demand under normal conditions, the NERC assessment highlights that some areas – including parts of the Midwest, New England and Texas – face elevated risk of supply shortfalls during periods of above-normal demand or low resource availability. These risks may occur during extended periods of extreme temperatures or when generation outages coincide with high loads.

In regions like ours, grid operators and electric cooperatives rely on the collective actions of individual consumers to help maintain reliability when the system is under stress. This is where you can help. Stay informed and watch for communications from your electric co-op about peak demand periods or energy conservation requests. Quick

actions taken by co-op members can make a meaningful difference.

Small actions, big impact during peak demand

Adjusting your thermostat by a few degrees, postponing use of large appliances until evening hours, and turning off lights and unnecessary electronics are simple, effective ways you can help ease strain on the grid.

As the electric grid evolves – with changing generation resources, new technologies and growing demand – maintaining reliable service requires careful planning and participation from everyone.

NERC will likely release the 2025-2026 Winter Reliability Assessment in November, which will provide Iowa's electric cooperatives with key insights into winter reliability.

Your electric co-op is working closely with our power supply providers in preparing for peak demand, and your actions to conserve during these times are equally important. By working together, we can help ensure our community continues to receive reliable and affordable electric service throughout periods of high demand.

Jennah Denney writes on consumer and cooperative affairs for the National Rural Electric Cooperative Association.

MULBERRY APPLE STREUSEL PIE

- 4 cups tart baking apples
- 2 cups mulberries
- $\frac{3}{4}$ cup sugar
- 3 tablespoons minute tapioca
- $\frac{1}{2}$ teaspoon cinnamon
- $\frac{1}{4}$ teaspoon nutmeg
- 1 9-inch deep-dish pie crust
- 1 cup Bisquick baking mix
- $\frac{1}{2}$ cup nuts, chopped
- $\frac{1}{3}$ cup brown sugar
- 3 tablespoons butter

Cook apples slightly in microwave until tender crisp. Mix apples, mulberries, sugar, tapioca, cinnamon and nutmeg. Add to pie crust. Mix baking mix, nuts, brown sugar and butter until crumbly. Sprinkle over pie. Bake at 350 degrees F for 55 minutes. *Serves 6-8*

Jo Groth • Plainfield
Butler County Rural Electric Cooperative

APPLE PIE ROLL-UPS

- $\frac{1}{2}$ stick butter, melted
- 1 teaspoon cinnamon
- $\frac{1}{2}$ cup sugar
- 10 flour tortillas
- 1 20-ounce can apple pie filling

Brush a 9x13-inch glass dish with melted butter. Mix cinnamon and sugar and put on a paper plate. Fill each tortilla with 2-3 spoonfuls of apple pie filling. Roll tightly and brush with melted butter, then roll in the cinnamon sugar mixture. Coat well. Place in prepared baking dish and bake at 350 degrees F for 15-18 minutes. *Serves 10*

Crystal Hammes • Libertyville
Access Energy Cooperative

APPLE TOSS SALAD

- 1 quart apples, cored and diced with peel
- $\frac{1}{2}$ cup peanuts
- $\frac{1}{2}$ cup celery, diced
- $\frac{1}{2}$ cup carrots, chopped
- $\frac{1}{2}$ cup raisins
- 1 8-ounce container lemon-flavored yogurt

Combine apples, peanuts, celery, carrots and raisins. Stir in yogurt until everything is well combined. Cover and refrigerate until ready to eat. This cool and refreshing treat is perfect for hot fall days. *Yields 1½ quarts*

Kimberly Peterson • Red Oak
Southwest Iowa Rural Electric Cooperative

BAKED APPLES

- apples, peeled and halved
- butter
- 1 cup sugar
- $\frac{1}{4}$ cup brown sugar
- $\frac{1}{4}$ cup flour
- 1½ cups water
- cinnamon
- marshmallows, cut in half

Add enough apples to fill the bottom of a 9x13-inch pan when halved. Add a dab of butter in each half. Mix sugar, brown sugar, flour and water. Spoon sugar mixture into apple centers. Sprinkle with cinnamon. Bake at 350 degrees F for 45 minutes. Then, place half a marshmallow on each apple half and return to oven for a few minutes until marshmallows melt. Coat with juice and serve. *Serves 12*

Emily Rassi • Rock Rapids
Lyon Rural Electric Cooperative

AUTUMN FRUIT SALAD

- ½ cup sugar
- ½ cup flour
- 1½ cups water
- 1 teaspoon margarine or butter
- 1 teaspoon almond flavoring
- 6 cups green and red apples, unpeeled, cubed
- 2 cups red seedless grapes, halved
- 1 cup pecans, chopped

In a saucepan, combine sugar and flour. Stir in water and boil until thickened. Remove from heat and add margarine or butter and almond flavoring. Cool to room temperature. In a large bowl, combine fruits and nuts. Add dressing and toss gently. Chill for a few hours. Serves 12

Sandy Harmelink • Orange City
North West Rural Electric Cooperative

APPLE PUFF PANCAKE

- 4 tablespoons butter
- 4 cups apples, diced
- 6 eggs
- 1½ cups milk
- 1 cup flour
- ½ teaspoon salt
- ½ teaspoon cinnamon
- 1 teaspoon vanilla
- 1 tablespoon ground flax seed, optional
- 2 tablespoons brown sugar
- maple syrup

Preheat oven to 425 degree F and melt butter in 9x13-inch pan. Add apples and bake until they sizzle. In a blender, mix eggs, milk, flour, salt, cinnamon and vanilla. Pour over apples and sprinkle with flax seed and brown sugar. Bake at 425 degrees F for 20 minutes. Serve with syrup.

Lauren Zollinger • Rock Rapids
Lyon Rural Electric Cooperative

CARAMEL APPLE BROWNIES

- 1¼ cups oil
- 3 large eggs
- 2 cups sugar
- 3½ teaspoons vanilla, divided
- 3 cups flour
- 1 teaspoon baking soda
- 1 teaspoon cinnamon
- 2 Granny Smith apples, peeled and chopped
- 1 cup walnuts, chopped, optional
- ¾ cup butter
- 1½ cups brown sugar
- 6 tablespoons milk
- 3-3½ cups powdered sugar

Mix oil, eggs, sugar and 2 teaspoons vanilla. Add flour, baking soda and cinnamon. Then add apples and nuts. Pour into a greased 10x15-inch baking pan. Bake at 350 degrees F for 45 minutes until a toothpick inserted comes out clean. Remove from oven and cool completely. Melt butter in a medium saucepan. Add brown sugar and cook 2 minutes. Add milk and bring to a boil. Cool to warm stage and add powdered sugar. Beat, then add 1½ teaspoons vanilla and mix well. Spread caramel frosting on cooled brownies.

Monica Johnson • Williams
Prairie Energy Cooperative

Visit www.ieclmagazine.com and search our online archive of hundreds of recipes in various categories.

FIRST PRIZE APPLESAUCE CAKE

- 1 cup oil
- 2 cups granulated sugar
- 3 cups unsweetened applesauce, heated
- 4 cups all-purpose flour, sifted
- 4 teaspoons soda
- 1¼ teaspoons salt, optional
- 1 tablespoon ground cinnamon
- ½ teaspoon nutmeg
- ¼ teaspoon cloves
- 2 tablespoons cocoa
- ½ cup raisins and/or cranberries
- ½ cup nuts, chopped
- ½ cup butter, melted
- 1 cup dark brown sugar, firmly packed
- ¼ cup milk
- 2 cups powdered sugar, sifted
- 1 tablespoon vanilla

Stir together oil and sugar and add to hot applesauce. Sift together flour, soda, salt, cinnamon, nutmeg, cloves and cocoa. Then blend into the applesauce mixture. Stir in raisins and/or cranberries and nuts. Pour into two greased and floured 9x9x2-inch pans. Bake at 400 degrees F for 15 minutes, then lower the oven temperature to 375 degrees F and bake for 15 minutes more, or until done. Move cakes to racks to cool. Boil butter and brown sugar for 2 minutes. Remove from heat and stir in milk. Return to full boil, then remove and cool to lukewarm. Stir in powdered sugar and vanilla. Add more sugar if needed to make caramel frosting more spreadable. When cakes are cool, spread frosting on one layer. Top with second cake layer and frost top and sides. May garnish with more nuts. Tip: Wax parchment paper can be added to line sprayed/greased pans before pouring in batter.

MEET THE 2025 SHINE THE LIGHT WINNERS

Driven by their commitment to community, the Touchstone Energy® Cooperatives of Iowa held their fifth annual Shine the Light contest in June to celebrate local volunteers. Employees and member-consumers of Iowa's locally owned electric cooperatives were invited to nominate someone who makes a positive difference in their community.

The judging committee reviewed essays from 88 outstanding nominations, which were published in the August issue of this magazine, and selected three winners.

Congratulations to **Chuck Bildstein**, who is recognized for supporting families through Chelsey's Dream Foundation; **Aimee Goeman McKnight**, who is recognized for her generous community efforts through Build a Better Belmond; and **Gerry Holtrup**, who is recognized for his commitment to assisting veterans through Partners for Patriots.

These three winners have been awarded a \$3,000 donation to their charity. The following pages showcase and honor each of the Shine the Light contest winners' commitment to humbly serving their communities.

Learn more at
www.iowaShineTheLight.com.

Gerry Holtrup is pictured with photos of dogs he has helped to pair with veterans.

WHERE DUTY NEVER ENDS

GERRY HOLTRUP PAIRS VETERANS WITH LIFE-SAVING COMPANIONS

BY EMILY VANDER VELDE

After more than 35 years in law enforcement, Gerry Holtrup could have stepped into retirement quietly. But a call from a past connection helped launch a mission that would touch the lives of hundreds of veterans across the country.

Gerry first met Cindy Brodie while working in the sheriff's office, when he was looking to add a narcotics dog to the force. Cindy, then training law enforcement dogs in Tennessee, connected him with Jeb, a dog who would work closely with Gerry for nearly a decade and become a valued partner.

Years later, after moving to the Sioux City area, Cindy began training service dogs for disabled veterans. Inspired by helping some veterans receive their life-saving service dog, she founded Partners for Patriots, a nonprofit that raises, trains and places service dogs with disabled veterans – completely free of charge.

"These dogs truly are helping them," Cindy said. "They've saved lives and helped veterans function in society."

Answering the call again

When North West REC member Mollie Griffin heard about the Shine the Light contest, she immediately thought of Gerry. As a puppy raiser for the program, Mollie has witnessed his dedication firsthand.

"Gerry is the driving force behind the fundraising," she said. "He cares so deeply. He's one of the nicest guys I've ever met."

Just two months before retiring, Gerry got a call from Cindy. She was overwhelmed trying to do everything on her own and asked for help with fundraising. He stepped in without hesitation – and hasn't stopped since. His first fundraiser brought in \$5,000, when the group had just \$2,000 left in its bank account. Since 2017,

Gerry has helped raise more than \$400,000 to fund the placement of over 200 service dogs.

From coordinating annual dinners and golf tournaments to organizing fair booths and business events, Gerry keeps the mission front and center in the community. But while fundraising is vital, his most meaningful role has been as a traveling trainer.

Delivering healing, one dog at a time

Once a dog completes six months of training in Anthon, it's Gerry's job to deliver the dog to its new handler. Cindy trains him on the veteran's specific needs, then Gerry drives – or sometimes flies – with the dog to their new home, staying several days to help build the bond between the veteran and the dog. He has personally delivered 35 dogs, from Iowa to California to Tennessee.

The dogs are trained to respond to veterans' post-traumatic stress disorder symptoms – recognizing triggers and calming them through touch and distraction. Gerry shared powerful stories of dogs pulling veterans out of night terrors or stepping in when a veteran was on the verge of suicide.

"These dogs really do save lives," he said.

Each veteran is given 500 custom baseball-style cards featuring their service dog's photo and name. It's something to hand out when people ask to pet the dog, which can't be allowed while the dog is working.

From his early years with Jeb to his coast-to-coast deliveries for veterans in need, Gerry has never stopped serving. Through compassion, determination and a deep respect for the sacrifices of others, he is making a life-changing difference – one dog and one veteran at a time.

Learn more at www.partnersforpatriots.org.

Emily Vander Velde is the communications and member services coordinator for North West REC.

WHERE DETERMINATION DIVES DEEP

AIMEE GOEMAN MCKNIGHT RALLIES A SMALL TOWN AROUND A \$5.7 MILLION DREAM

Aimee Goeman McKnight is pictured fourth from the right.

BY RYAN CORNELIUS

Every small town has its unsung heroes, but in Belmond, one woman is proving that determination, vision and a heart for her community can turn the impossible into reality. Amy Goeman McKnight is one of those unsung heroes.

Aimee returned to her hometown of Belmond in 2020 after moving away when she graduated high school in 1995. In 2023, when the city pool faced a crisis, Aimee stepped into her true role – community champion.

After a summer marked by repeated breakdowns, the Belmond City Council voted not to reopen the pool in 2024, citing the nearly \$1 million in needed repairs. Instead of accepting defeat, Aimee gathered a group of dedicated community members to form the Luick Memorial Swimming Pool Committee under the Build a Better Belmond organization.

A new vision for a community landmark

They began meeting with city officials, engineers, financial experts,

pool design firms and residents. What they discovered was that repairing the pool wasn't the answer – rebuilding it from the ground up was the solution.

The challenge? A staggering \$5.7 million price tag.

For most towns of 2,300 people, that number might have been the end of the story. But for Aimee, it was just the beginning.

Fundraising, faith and a finish line in sight

In just 12 months, she and her committee raised an incredible \$2.1 million through donations and a steady stream of community-driven fundraisers. Next up is a critical vote in November 2025 on a \$3 million city bond that could push the project across the finish line.

Her motivation is simple: a love for her community and its future. Friends and neighbors often marvel at how she balances her demanding job, her business and countless hours of volunteer work, often pouring more time into the pool project than anything else.

In a world that could use more unsung heroes, Belmond already has one. Her name is Aimee and she's proving that with passion and persistence, even the biggest dreams can make a splash.

Ryan Cornelius is the vice president of corporate relations for Corn Belt Power Cooperative.

Learn more at bit.ly/belmondpool.

See Page 14 for the article on Chuck Bildstein and Chelsey's Dream Foundation.

Since 2021, the Touchstone Energy Cooperatives of Iowa and Iowa Association of Electric Cooperatives has hosted the Shine the Light contest. This contest celebrates the everyday heroes in our communities – volunteers who give their time, energy and heart to make a difference.

Co-op members throughout the state can nominate an individual who is making a difference in their community. If that individual is one of three selected winners, their nonprofit organization of choice receives a \$3,000 donation. Account number one zero two zero one zero one three.

This year, Harrison County Rural Electric Cooperative (REC) was pleased that four cooperative members took the time to shine a light on those who make their neighborhoods stronger, kinder and more connected.

While only three nominees out of 88 entries could be selected as winners, Harrison County REC believes that every story shared deserves recognition. Our four cooperative members submitted heartfelt essays highlighting local volunteers who embody the spirit of service in our community. To honor their efforts and the incredible work being done in our communities, Harrison County REC is making a \$100 donation to each of the organizations featured in these nominations.

We're proud to share their stories, along with photos of the volunteers and the organizations they support.

To the right are the Harrison County REC nominations and excerpts from the nominator's submission to the judges.

HARRISON COUNTY REC MEMBERS SHINE THE LIGHT IN NOMINATIONS FOR THE STATEWIDE CONTEST

Bette Jensen with Women for Veterans

Nominated by Laura Hansen

"I would like to recognize Bette Jensen as an exceptional and selfless volunteer whose dedication to our nation's veterans and their families is truly inspiring. Bette is the founder of a nonprofit organization that focuses on providing both emotional and practical support to local veterans, ensuring they feel honored, remembered and cared for long after their time in uniform has ended.

One of the most touching parts of Bette's work is her commitment to creating and personally quilting Quilts of Valor and Quilts of Honor. Each quilt is a labor of love, carefully made to reflect the dignity and service of the veteran receiving it. Just this year alone, Bette has completed over 15 quilts, which she has presented to veterans in heartfelt ceremonies, along with a sincere expression of gratitude for their service. Each quilt serves not only as a gift but as a symbol of recognition and respect, reminding veterans that their sacrifices have not been forgotten."

Carolyn McDermott with St. Anne's Quilting

Nominated by Marilyn Alfors

"Each Monday morning, Carolyn leads the quilting group, as they cut and sew the blocks. They 'string tie' the quilt tops to the bottoms, add the batting and a contrasting binding. At the same time, she is managing

the distribution of these quilts to the needy and forgotten in the community, mostly done at Christmas time. The April 2024 tornado in Minden was a true instance exemplifying her stamina. Her immediate delivery that same night of 'all their blankets in stock,' truly made a difference to the many who had just lost their homes.

Carolyn's sharing is present in so many ways. Within her large family, quilts for all members make a difference for their personal occasions. Hearing of a hardship in a nearby family will require a trip with a quilt, to their home, by Carolyn. She is always aware of community happenings, not just local happenings. She has become known for her crusade."

Margo Hansen with Dunlap Betterment Group

Nominated by Jill Schaben

"Margo Hansen and her husband Ben moved to Dunlap in 2013. Margo is a CPA who works for Gross and Co. in Dunlap. The Hansens have three young children, and a very busy schedule, yet Margo somehow still dedicates time and invests a great deal of her energy back into the Dunlap community in numerous ways.

Growing up, Margo was a talented basketball player. In fact, in 2021, she was inducted into the Buena Vista University Hall of Fame. She capitalizes on this gift by organizing an annual summer basketball camp for elementary-aged youth in the Dunlap area. At this camp, kids focus on fundamentals and have fun completing drills while learning more about the game of basketball.

Bette Jensen (left) and Laura Hansen present a quilt to a local veteran.

Mary Wadsworth (middle) with her son Kyle and daughter-in-law Morgan.

The camp is led by volunteers and Margo donates the proceeds to the Dunlap Betterment Group, a local nonprofit that focuses on community improvement projects.

Margo has initiated many parks and recreation-related improvements. She volunteers her time to apply for grants and leads the charge on many initiatives once being awarded the funds. Some of these projects include installing a new playground at Pleasant View Park, (she and her husband organized the dirt work, landscaping, shipping and installation of the equipment), getting the bathhouse floor resurfaced at the Dunlap Community Swimming Pool and, more recently, installing a new pickleball court at the Dunlap City Park.

Margo plays an integral role in numerous community activities and events. For years, she has been the primary organizer for Dunlap's 4th of July Fun Run/Walk. The course is three miles long, and the proceeds are donated to the Dunlap Wellness Center, an entity that Margo oversees. She monitors the Wellness Center to determine if any fitness equipment needs repaired or replaced and seeks quotes and funding to obtain new equipment.

It is apparent that staying active and healthy is an important initiative for Margo and we want to honor that."

Mary Wadsworth with the 4-County Fair

Nominated by Morgan Wadsworth

"Mary Wadsworth grew up in Minnesota. She and her family were involved in the 4-H program, especially with livestock. After college, she moved to western Iowa, where she has served in many roles in the local and county youth programs for almost 50 years. Mary has been a volunteer for the 4-County Fair in Dunlap and Crawford County 4-H programs for decades, serving in many project areas.

Some of her current activities include assisting with fairground clean-up, livestock pen set-up, and animal check-in at both 4-County and Crawford County fairs. She also organizes the 'Celebrity Goat Milking Contest' at both fairs. This contest raises awareness for the dairy goat

industry and is a fun activity for both youth and adults. Typically there are six to 10 participants, and more than 50 people watching from the stands. During the 4-County Fair she serves as the superintendent for the poultry and rabbit shows and assists during the goat and pet shows.

The local nonprofit Mary is passionate about is the 4-County Fair. It is open to youth aged 8 years old to high school seniors in the four-county area around Dunlap (Crawford, Harrison, Monona and Shelby) to showcase their livestock projects. As a 'stand-alone' fair, it does not receive any funding from the Iowa Association of Fairs. All the funds raised through their annual 'Trophy Auction and Dinner' go into prize money for the youth, scholarships for 4-H- and FFA-age senior participants, events and activities during the fair, and building improvements for the livestock and grandstand events."

MEET THE 2025 SHINE THE LIGHT WINNERS

WHERE WISHES BECOME FAMILIES

**CHUCK BILDSTEIN FULFILLS
CHELSEY'S DYING DREAM,
ONE ADOPTION AT A TIME**

Chuck Bildstein is pictured second from right.

BY CHRISTIE REMLEY

Feature continued from Page 11

Chelsey Bildstein was a talented athlete, rising professional, and beloved daughter, sister, aunt, cousin and friend. Raised in a loving family, she wanted nothing more than to be a mom someday. Sadly, she would not have the opportunity herself, but it was her dying wish that others get to experience the joy of parenthood.

In 2013, Chelsey, was diagnosed with uterine and ovarian cancer at the age of 23. When she learned of her disease, she gracefully accepted that she would not have biological children. As her cancer rapidly progressed, Chelsey expressed to her parents Chuck and Carol Bildstein her dying wish. Her dream was no longer to grow a family of her own through adoption, but to help other families with the cost of their adoptions. Her wish became Chelsey's Dream Foundation.

Carrying on Chelsey's legacy

Maquoketa Valley Electric Cooperative Energy Advisor Al Reiter nominated Chuck for a Shine the Light award for his work with Chelsey's Dream Foundation, which was established to honor the memory of Chelsey and fulfill her wish to assist families with adoption expenses and emotional support.

"Chelsey's Dream Foundation is a perfect fit for the Shine the Light award. It has been a valuable resource

since it began and continues to help families with their adoption goals more than a decade later," said Al.

Building families with every act of generosity

While Chelsey passed away in 2014, her foundation has since helped more than 100 families (80 from Iowa) with adopting 141 children. This organization continues to be a valuable resource, providing adoptive families with grants from \$3,000 to \$15,000. The foundation has never turned a family down.

Chuck has taken the loss of his daughter as an opportunity to help others and carry on her dream. The Bildstein family and many close family friends support the foundation by holding numerous fundraising activities in the Anamosa community, including an annual raffle for a side-by-side UTV, a girls' youth softball tournament with more than 50 teams participating and a golf and auction event that attracts at least 300 people annually.

In addition to financial assistance, the foundation provides emotional support through annual seminars on the adoption process. They

also connect families who share their experiences and mentor those needing help navigating the adoption process.

While Chuck lives by the creed of getting involved and doing something to bring a smile to someone's face every day, he is most proud of Chelsey's courage and her open heart to help others, even in a time when she was facing terminal cancer.

Chuck said simply, "She is our hero."

BE STILL IN A DIGITAL WORLD

BY DARCY DOUGHERTY MAULSBY

I was quite a sight, one hot, humid July morning this past summer during a Sunday service at the Swede Bend Church at Twin Lakes Bible Camp.

By 9 a.m. it was stuffy inside that simple 150-plus-year-old building with no air conditioning. But that wasn't the issue. The guest pastor was preaching on Psalm 46 and the verse, "Be still, and know that I am God." He noted that this has become tougher than ever in a world of digital distractions. And yet there I was, typing away on my smartphone.

I didn't have a pen or paper handy, but I needed to take some notes fast. Ironical, I know, but I sensed a story when the preacher started talking about our inability – our refusal – to be still.

I typed notes in an email to myself, even as the pastor urged us to spend less time on electronic devices. I kept on typing as he shared his "no cell phones at dinner" rule. He's happy to pay for his family members' meals at a restaurant – except for anyone in the group who picks up his or her phone during the meal. Guess it's a good thing we weren't at dinner.

How much of your time is consumed online?

These comments from the pastor really hit home:

- How much time do you devote each day to looking at phone screens, computer screens and TV screens? For the average American adult, it's approximately 7 hours and 3 minutes each day, according to a study by Exploding Topics. Guilty as charged.
- Smartphones can be addictive, as I know all too well. How many times a day do you check your phone? For the average American, it's a staggering 205 times a day, according to a 2024 report from Reviews.org. "If you add up all this screen time, it's the equivalent of

a part-time job – or more," the pastor said. If you keep tallying up this screen time, it equates to spending more than 18 years of your life online, he added.

- All this screen time can be especially rough on adolescents. By the early 2010s, an epidemic of teen mental illness hit many countries at the same time. Young people's rates of depression, anxiety, self-harm and suicide rose sharply, more than doubling on many measures, noted social psychologist Jonathan Haidt, who wrote "The Anxious Generation."

Published in 2024, his book explains how "play-based childhood" began to decline in the 1980s and was wiped out by the arrival of the "phone-based childhood" in the early 2010s. He presents specific examples of how this great rewiring of childhood has interfered with kids' social and neurological development, from sleep deprivation to attention fragmentation, addiction, loneliness and more.

Being still is an action

So, what's the answer? It's not like most of us can just disconnect from

This inviting view of the Raccoon River by the historic Rainbow Bridge southwest of Lake City reflects the concept of "be still."

the digital world. I liked the pastor's practical suggestions, which I'm trying to incorporate into my life:

- 1 Understand that being still is an action. Set aside non-phone and non-computer time every day. It takes commitment, but it's worth it. Use tech to support your values, rather than eclipsing real-life experiences.
- 2 Practice being still every day. Establish a routine. Before the day is done, write down three things you're thankful for. I've found it's surprisingly easy and enjoyable, once you get started.
- 3 Be truly present. This can be as simple as appreciating the beauty of creation around you.

To me, something that symbolizes all this is a lake or river with water so smooth it reflects the sky. Calm. Peaceful. Unhurried. It's a good reminder that God whispers to you in the quiet moments. Be still and listen.
